

FMA-ANZ is a collegiate body of the manufacturers and suppliers of fan equipment speaking in one voice to represent the needs and wishes of the members of the association.

FMA-ANZ aims to provide representation for the development of the fan equipment industry such that it can thrive and grow.

FMA-ANZ aims to:

- Develop communication networks to provide representation for the fan equipment manufacturing industry in Australia and New Zealand.**
- To increase the profile of the fan industry into government and non-government organizations who are stakeholders of associated industries.**
- To increase the profile of the fan industry into government and non-government organizations who are stakeholders of environmental associations.**
- To increase the profile of the fan industry into government and non-government organizations who are stakeholders of safety associations.**
- To develop the education of engineers in the design, application and use of fan equipment and systems.**

FMA-ANZ wish to:

Develop systems of self-regulation to be incorporated within the framework of the Minimum Efficiency Performance Standards (MEPS) in Australia and New Zealand; and

Work with Standards Australia and New Zealand to effect changes in appropriate standards; and

To represent the non-domestic fan industry's views and capabilities in the following bodies:

- **ISO**
- **Standards Australia and New Zealand**
- **Australian Building Codes Board (BCA)**
- **National departments/agencies responsible for energy efficiency policy and regulation of air movement products, components and systems**
- **Testing facilities**
